There's an urgent need to manage the impact of specialty medications

Specialty drugs are on the rise...		<p>Specialty drugs are currently used to treat a widening array of chronic and complex conditions, and they are the fastest-growing part of drug plans.</p> <p>In 2019:¹</p> <ul style="list-style-type: none"> • Average cost/claim for specialty drugs rose by 2.1% • Utilization increased by 7.8% <p>Given Canada's drug pipeline, these trends are expected to continue.</p>
...and they're complicated to manage		<p>Employees on specialty medications need more complex support at every stage of their treatment journey, regardless of manufacturer-sponsored patient support programs</p>

Specialty Care makes it simple

We provide extra support for employees on specialty medications		<ul style="list-style-type: none"> • We work with employees and their healthcare teams to provide additional support when needed, to help better manage side effects and adherence to medications, and to ensure employers get the most from their drug spend
We offer reimbursement support & savings		<ul style="list-style-type: none"> • For employees: Our dedicated case managers assist with reimbursement strategies to maximize coverage from all available funding sources • For employers: We offer preferred pricing on high-cost medications, helping to manage specialty spend
We promote better outcomes		<ul style="list-style-type: none"> • Our case managers foster a high level of patient interaction, which in turn encourages positive health outcomes • Healthy outcomes mean improved productivity, less time off work, and lower absenteeism

We can help take the complexity out of specialty medications.
